“Coincidence” or Preponderance of Evidence - Part 3

Wilfred v The Rothschild Family, Clintons’ “Benefactor”

Interview Outline to Jason Goodman

Crowdsource the Truth

Part three of this interview series outline advances the Clintons/CIA influence through the highest Asian government and financial circles to the global monetary power brokers of the Rothschild’s banking empire.

By 1998, the CIA had reportedly gained control of at least eleven out of thirty-four Mitsubishi Bank Certificates of Commercial Obligation (“bank Notes”) originally issued to Central American countries in the late 1960’s. With the first Note converted from \$6 to \$15 Billion in US Treasury Bills in early 2001, the Clinton/CIA “Cash” funded covert laundering operation had begun. At that time, it was also reported to the Securities and Exchange Commission that the Bank of the Republic of China was involved in the authentication of the transaction.

Just to recap my story up to the point of the covert Clinton/CIA transacting of the first Mitsubishi bank note, the reader may recall that I had advanced through a number of personal challenges from 1990 through 1996 (see April 17, 2018, [Interview Outline - Coincidence or Preponderance of Evidence](#)):

- 1990 - Law suit against the Colorado family court system for violation of my civil rights
- 1991 - \$30 Billion US tax-payer class action suit against the Resolution Trust Corporation
- 1994-1996 - FBI probe of the El Paso County Pension Fund embezzlement scheme exposing the County DA in a cover up that prompted the conviction of the pension fund administrator and the fining and dismissal of various county officials

In 1996, having made enemies of the good old boys in Colorado, I moved on as an international real estate and financial intermediary. In June 1996, I was contracted by the CIA as an “asset” to assist in setting up a private trust system to transact the Mitsubishi Notes. Simultaneously and totally “coincidentally”, in April of that year I was introduced to what I discovered later was an influential member of the Rothschild family who happened to have a private trust in Lichtenstein.

April, 1996: I will now focus on details surrounding my “chance” introduction to the Rothschild family through a member then living in Colorado Springs, Colorado. I was contacted in my capacity as Director of my company, Arcore International Funding at my Colorado Springs office by a local investment broker. For the purpose of anonymity, we will call him Bill. After some discussion, we determined that our common Christian principles as applied to all business practices were consistent, and as such we decided to immediately explore joint opportunities in international banking and investments.

Bill was a senior member of an international business trust of whom the principal trustee was a gentleman named Sergio Emmanuel Arciniegas. A meeting was immediately arranged to introduce me to Mr Arciniegas. At our first meeting we shared our common business goals as they related to international

banking and finance. Sergio told me that he had significant global family banking contacts and resources that he would bring to bear on proposed joint ventures. He also pointed out that he was a Messianic (Christian) Jew and his spiritual beliefs were a cornerstone of all his business principles and practices. The following is from my notes and best recollections of the subsequent meetings and events.

The Rothschild Connection

As my personal Christian Pentecostal/Charismatic belief included the baptism of the Holy Spirit and the operation of the gifts of the Spirit; during Sergio's first business presentation at my office, I received a vision through the gift of knowledge about Sergio and his family that was extraordinary. I felt compelled to respectfully interrupt him and promptly share this information in detail.

I told Sergio and his associates that there were several elders of his family who headed an international cartel that dominated the global banking systems including the top 25 Western European Banks and beyond, with significant influence over decisions in the national and international scene. I also saw Sergio as ready to take over the head of this family business as these elders retired. Sergio was astounded and immediately stopped the meeting and asked to speak with me privately. When the others left the room, he told me that not only was my vision accurate, but there was no way I could know this without having such a gift, and as such, any further exchanges were to be strictly confidential with him alone.

Sergio then adjourned the meeting and set up a one-on-one meeting the next day for further disclosures and discussion. He proceeded to tell me that he had three uncles in their 90's ready to retire and that he was next in the blood line of the family to take the head of all the global banking and international corporate interests. He had a file with him on his personal history and credentials that told the story of his living in exile in the United States from competing elements of the Rothschild family until recent years (he was around 35 when I met him in 1996). His formal Jewish name was revealed as Shmmuel Emmanuel Abijah, related by blood to the Rothschild's and a descendent to the Old Testament (Tonakh/Torah), King David.

Because Sergio had no contact with the Rothschild family or the business until recently, and was due to be literally put at the helm, he was seeking a financial assistant and spiritual ally with the same Christian beliefs who could work closely with him as he proceeded with his leadership responsibilities as a Messianic (Christian) Jew. In effect, his Christian belief that Jesus is the Messiah was in direct and marked conflict with his family's orthodox Jewish belief. This put his bloodline inheritance in spiritual conflict with his family. What made matters worse was his decision to bring me into the business as a gentile (non-Jew). This certainly made for some interesting challenges ahead.

Over a period of three months Sergio introduced me to the family banking business by disclosing multiple examples of past international banking transactions in billion-dollar denomination so that I may learn the business in a kind of "on-the-job training".

CIA Assignment Overlay

By June 1996, I was approached by the CIA supposedly separate from the Rothschild opportunity, albeit being under the US intelligence "all-seeing-eye" with my Top Secret clearance from the military; I have always suspected this was a primary reason for my recruitment. Upon my acceptance of the assignment to transact the first multi-billion-dollar Mitsubishi Bank Note, under the CIA mandate, I required a private trust

to proceed covertly. It was indeed convenient to have what I eventually discovered was a Rothschild private trust at my fingertips.

July 1996: My CIA handler provided contact information for an international private trust to propose the private transacting of the Mitsubishi Note. Upon making contact with Ms Marilyn Perry, Trustee of Bay State Trust headquartered in Lichtenstein with an office in Boca Raton Florida, we discussed the opportunity and agreed that we should meet in Zurich, Switzerland soonest to have a closer look. Upon my arrival in Zurich, I received a fax copy of the Note at my hotel and Marilyn and I examined it together. After her sources confirmed the Note's initial authenticity, she agreed to proceed, but due to the magnitude, would seek a partner. I then told her of my position with Mr Arciniegas and she suggested setting up a meeting with him in Zurich at the earliest. I contacted Sergio and he arrived in Zurich the next day to discuss a joint venture on the project.

August 1996: A deal was negotiated between these two Lichtenstein trusts to jointly transact the Mitsubishi Note and the process began to fully authenticate the bank certificate, including a researched history of the note and all interest coupons transacted. The note was also curated for date confirmation and confirmed with the Bank of International Settlements in Switzerland as well as the Central Bank of Japan. During this process it was discovered that some interest coupons had been utilised in the 1970's by then Lt Col Oliver North to covertly fund the Iran Contra arms deals in Central America. Although I personally objected to transacting what I then saw to be a significantly tainted Note; when I communicated this to the trusts, the CIA stated they had long since ceased this activity and the transaction was permitted to continue by the trusts. I was ordered by my CIA handler to "complete the deal."

After the initial meetings in Zurich, Sergio drove me by car to Lichtenstein, which was a 90-minute drive from Zurich. Upon our arrival, we entered the Bank of Lichtenstein and were escorted into an elevator to access the secured lower level safety deposit box repository. The elevator had no control panel and received his instruction by an internal security camera. Once in the repository, Sergio produced his personal key and opened a large fortified deposit box. He then proceeded to show me a stack of multi-billion US Dollar bonds that had been transacted by his trust on behalf of specific Eastern European countries. He stated that these were his first bank notes transacted on behalf of the family.

After that day Sergio and I commenced a series of meetings in Zurich and Colorado upon our return at my offices in Colorado Springs, where he laid out an extraordinary future vision of his Trust as it related to what I was then informed was the Rothschild global vision. To my surprise, Sergio produced copies of 34 additional Mitsubishi Notes from the same series and stated that his family was behind the original release of these debt instruments. Although they had indeed been tainted by their misuse in the 1970's and thereby prohibited to be transacted further by governments, as long as his family provided oversight, the eleven notes assigned to the CIA were released for transaction in their private system.

I took copious notes and created summaries of these meetings with diagrams of the form and structure laid out by his descriptions of what he saw as his current and future relationship with the Rothschild grand plan. I was amazed that he had all of this in his head with nothing in writing.

What Sergio revealed was the deliberate planned Rothschild destruction and futuristic rebuilding of the entire global economic system that they had already begun, utilising the family international corporate conglomerates, banking networks and resources.

The following are key points of The Rothschild Global Plan:

1. The Rothschild corporate and banking interests were in the process of expanding the international money supply exponentially by lodging multi-billion-dollar-bank notes in the top banks and trading on their value under a private reserve system. With this system, the value of these bonds could be multiplied up to 10 and as much as 100 times value to create massive private cash reserves.
2. The cash reserves created by these Private “bank trading programs” were earmarked to buy up in masse all non-perishable stable global assets such as gold and precious metals, prime agricultural land, art works, corporation interests in weaponry, critical patents for chemical, biological and medical breakthroughs, equipment, goods, services, medical supplies and drugs; and essentially anything and everything that has prolonged and stable value for the human race.
3. As these assets are acquired, a simultaneous and deliberate destabilization of the world economic system would ensue through a constant series of deliberate and orchestrated catastrophes and terror events to prepare the world population to receive the new purported peaceful and safe economic system under the new Rothschild Empire. Since 1996, it is quite apparent that in many cases unexplained catastrophic events have indeed been taking place with increasing frequency.
4. Once the global collapse of the economic and banking system is in full swing, the Rothschild proposal will be presented to the international community as a new and stable system backed by real global assets with an accompanying single international currency. All international debt will be expunged, and the new system will be based on the managing and production of real goods and services without the burden of massive debt instruments.
5. The final steps to this transformation are in my opinion the most apocalyptic and shocking of all. I was informed by Sergio that the Rothschild family are considered even by the Israeli government, the unspoken “Royal Family” of the Hebrew race and God’s chosen people.
6. As the direct blood descendants of King David, it is Jewish prophesy that upon the Israelites return to Jerusalem, the Jewish Messiah will appear with the mandate by God to rebuild the Temple In Jerusalem and restore the Hebrew monarchy upon the throne.
7. The Kingdom of Israel and the Royal Family will then take their place to rule all of the kingdoms and peoples of the earth. Although these sounds almost like a fairy tale, with the financial power taken by the Rothschild family under their plan of global domination, they truly believe it is not only possible, but their God given right and mandate.

Although this seven-step process to a purported Rothschild new, safe and stable global Jewish Kingdom is vastly over simplified, it is the substance of what was communicated to me by Sergio 22 years ago.

I was not surprised to hear that the Rothschild system in place today is not far from global domination with family members already assigned and controlling central banking systems country by country. This is poignantly illustrated by the following articles in the Event Chronicle and the Investment Watch Blog dated July 20 and January 30, 2017, respectively [“Only three countries left without a Rothschild Central Bank!”](#), [Only three countries left without a Rothschild Central Bank – 3 more wars?](#)

As a Messianic Jew, it was Sergio's strategy to infect this grand Rothschild plan with a Christian bent, cushioning the blow of the planned dramatic global changes with humane ways of executing the step by step process. My advice was to begin this influence on his family without delay. Frankly, I had serious doubts about Sergio's success with these intentions due to at least the following primary family issues at hand:

1. As a Messianic Jew, the family appeared to be already considering passing the hereditary baton to Sergio's cousin of a similar age, but with a lifetime of banking and investment experience.
2. As for his inclusion of me as his assistant, non-Jews or gentiles were not only not tolerated in the family business but considered "unclean". When I asked where I was to stay in Zurich during our business meetings, Sergio told me I would have to remain in a separate hotel, as the family compound disallowed gentiles; should they find that I had stayed, upon my leaving they would burn all sheets, towels and usable items to completely cleanse the accommodation.

February 1998: Up to February 1998, there was continuing confusion about Sergio's position in the Clinton/CIA Rothschild joint effort to form the required "covert bank". In fact, the CIA deliberately made sure he was out-of-play and out-of-touch somewhere in either the UK or in Europe while the Mitsubishi transaction progressed and was finally completed well under the radar. Once I was arrested and incarcerated in Canada on 14 February, 1998, Sergio had also been picked up in London for his alleged involvement in the Mitsubishi transaction; and was fined \$75,000 and released. When Carolyn wrote to requesting assistance in our dilemma, he declined to help and just disappeared without further contact.

March 2000: We have since discovered that Nathaniel Rothschild (about the same age as Sergio) was named Executive Director of the Lichtenstein Rothschild Investment Trust. Was this Sergio's cousin who usurped his blood heritage because of what his family considered a complete lack of good judgement and bad spiritual choices? We have not heard from Sergio since 1998 and have no way of contacting him.

It's time to consider what can or should be done about the now revealed Rothschild global vision of world domination accompanied by the Family funded CIA/Clinton Cartel. Although the CIA could easily be assigned as the Rothschild international enforcement arm, what role would the Clintons play in this benevolent dictatorship on behalf of the United States and the global community? A scary thought for sure!

Best Regards to all!

Harmon and Carolyn Wilfred
